Layer these glazes for unique colors and effects: [\\*High Gloss Colors](#) | [\\*\\*Matte/Satin Colors](#)

## Aventurina colours

The Terra Bella series consists of 6 exclusive "Aventurine Colours", formulated for application combined with other colours, to create unique and surprising effects and to enhance and transform the original shade.

Only 1-2 thin coats can be applied.

Rustic Brown #550 creates weathered/rustic look on rims and works great on textured pieces, Spruce, Emerald and Seaweed move and flow creating beautiful drips and surprising effects!

NEW!!! Transparent "Ghost" FLUX and "CREAMY" FLUX are moving glazes and with generous amount over the other Terra Bella colors, they will create beautiful high fire flow results.

## Application Instructions

- Shake well before use.
- Apply 3 coats (except for the Aventurines) using soft fan brushes for larger surfaces.
- Use only on low-fire clay bodies.
- Fire to cone 05-06.
- These glazes will appear different depending on the thickness of application.
- Terra Bella glazes cannot be dipped in clear glaze.  
*Do not dip in clear glaze!*
- Clean up with water.

Terra Bella specialty glazes allow artists achieve variety of styles in one product, considering glaze application, firing temperature and shape of pottery will influence the outcome of the finished work. Endless color combinations can be achieved layering these glazes! Some colors are two-toned glazes, some are glossy/solid or transparent colors and react with certain colors creating patterns or flows when layered, some

**C**

have speckles and then! There are 6 unique glazes (HSC 550, 575, 576, 577, 579, 580) which are called Aventurina's, that enhance/change/react or over or under the rest of the Terra Bella glazes. Only 1-2 thin coats can be applied (heavy application of these glazes result in crazing or pinging even cracking from stress. Therefore not making them food safe). Terra Bella glazes are non-toxic and safe for Food Containers.

## FIRING TEMPERATURE

Orton Cone : 06 | Celsius degrees C° : 1000° | Degrees Fahrenheit F° : 1832°
