WATCH THE TUTORIAL

Engobes are finely ground clay based pigments. They are formulated to match the firing shrinkage and thermal expansion of the clay. Apply to wet or leather hard clay. The result of the raw firing is a matte, slightly rough surface. The piece can be fired again with our transparent clear glaze to get a brilliant sheen and intensify the color of the engobes.

Engobes can be applied on bisqueware using 2-3 layers for solid/opaque finish or use as a one stroke watercolor painting technique. Most of colorobbia art engobe colors can be fired up to cones 7/8 stoneware firing temperature. Some colors might fade. Please test first. You may apply engobes on the bottom of wares and fire without stiling. Always test first.
