HMT 2-765 118 ml
HMT 3-765 473 ml

Black crow

HMT 2-766 118 ml
HMT 3-766 473 ml

The products from this serie are divided by usage temperature from 1000° to 1100°. They represent one part of the numerous glazes and crystalline colors developed during Colorobbia dye factory's hundred years activity, in a ready to use formula. These products are advised for an expert usage. The glazes vary from classic coverage, glossy, satin finishes to special finishes. Together with reactive

C

glazes, the results can vary based on the preparation, application and firing phases. Every glaze, except from the reagent ones, can be mixed together or with white glazes to obtain medium tones. Transparent glazes are neutral or colored transparent with a glossy, satin or craquelè finish, and preferably used on white bisqué, perfect to highlight the bas-relief and carvings. They can be mixed for medium tones.
