Violette

HSS 8-119 236 ml

Colorobbia Fairy Dust transparent glazes add a sparkly effect to any project. Use 1-2 coats on any piece for an intensely sparkly look. Dipping in clear glaze not needed. Can be used in combination with BLS or Engobes and overglazes.

C

Fairy Dust specialties glazes are for low fire only. We do suggest using dedicated brushes to avoid eventual contamination by its special sparkle before using them along with other products (clear glaze, or on BLS).
